### **Ben, DL6RAI has become SK**

### **VP66 Ducie Island – Ground breaking Remote Operation**

This will be the first full DXpedition utilizing the RIB concept that features a large number of remote operators with a small footprint on a remote island. Four RIBs (Radio In a Box) will provide a total of 5 stations capable of 24/7 operation on 10 bands.

The RIBs feature complete stations capable of up to 1 kW in a weather-tight housing that allow remote operation. These RIBs were developed with support from Northern California DX Foundation. The goal is to enable a new, minimum impact operating mode for environmentally sensitive areas. RIBs also speed up the installation of stations. This will enable our small three-person team to build the five stations, including antennas, in a relatively short time.

All donations should be made to the Northern California DX Foundation. Ducie island is No 56 on Club Log's most wanted list. On the 6 meter band it is No. 26, therefore given we will be active during the E season, a special focus will be placed on 6 meter operation with gain antennas and a power amplifier. Additional details and the list of operators, as well as regular updates will be posted on the VP6A QRZ.com page.
